Professional Summary

I am a versatile individual with understanding and practical experience of web development using HTML5, CSS3, JavaScript, React.js, Next.js, Bootstrap CSS, Tailwind CSS, etc, and is aspiring to be a full-stack web developer. I demonstrate strong problem-solving abilities and the ability to deliver high-quality results. I am adept at communication and collaboration, ensuring seamless project execution.

Education

Babcock University, Ilishan-Remo, Ogun State - *BSc*

October 2021 - July 2025

- BSc degree
- I studied computer science (information systems).
- Graduated with Second-Class Upper Honors

Rainbow College, Surulere, Lagos State - *High school Diploma*

September 2015- September 2021

I acquired my high school diploma at Rainbow College Day after a six-year learning experience at the institution.

Skills

- Front-End Web Development • HTML5 • CSS3 • Bootstrap CSS • Tailwind CSS • JavaScript • React.js
- Next.js • MongoDB • Wordpress • jQuery • APIs • RESTful APIs • Command Line • Git & Github • SQL •
- Python • Django • Data Analysis • RStudio • IBM SPSS Statistics • DBeaver • Problem Solving • Project
- Communication

Certificates Obtained

- The Ultimate 2025 Fullstack Web Development Bootcamp : Ongoing
 - Web development fundamentals, HTML 101, HTML 201, CSS 101, CSS 201, CSS 301.
 - JavaScript 101, JavaScript 201.
 - Bootstrap, jQuery, React, APIs...

- Mayerfeld Consulting Practicum Program in the field of Data Analysis: 2025
 - Made use of tools like RStudio & IBM SPSS Statistics for analysis and Dbeaver for SQL.
 - Carried out descriptive analysis and documentation on various case studies and research questions.
 - Worked in groups to analyse ambiguous datasets.

Final Year Project

Babcock University

DECEMBER 2024 - MARCH 2025

Engineered a website for Smart Agriculture System Using IoT Sensors 'Agrotech'. Employing HTML, CSS, JS, and PHP. Agrotech is a web platform that enables farmers to access real time sensor data from their farms. Sensors such as humidity, temperature and moisture sensors were deployed, the sensor data was fetched using API keys. Sensor data was displayed in 3 display options, tabular, card and chart, as well as actionable insight (e.g “water immediately”, “monitor for fungi” etc.) for the farmers in regards to the sensor data.

Personal Projects

Web Portfolio

I built a responsive and user-friendly portfolio website that allows users to know about me, view my work and live demos, and contact me for collaborations. Built with HTML5, CSS3, and JavaScript.

Weather App

I built a responsive and user-friendly weather application that allows users to search for current weather conditions in any city worldwide. Features real-time data including temperature, humidity, wind speed, and weather description, powered by the OpenWeather API. Built with HTML5, CSS3, JavaScript, OpenWeather API & Geolocation API.

Work Experience

Integrated Software Services Limited, Surulere, Lagos – *Intern*

JUNE 2023 - AUGUST 2023

- Developed websites using HTML to establish robust structures.
- Utilised CSS for visual styling and layout enhancements.

IHS Towers – *Intern*

JANUARY 2024 - JUNE 2024

- Network Operations Analysis
- Utilised ServiceNow, ElasticNet, and Operation Web Services for network operations analysis.
- Conducted thorough assessments using advanced analytical tools to enhance operational efficiency.
- Monitored network performance metrics to identify and resolve issues proactively.
